

Clartech
Engineers
Private Limited

Definite Technology for
Weaving Preparatory

Sectional Warping Machine

MODEL : NEOTECH
for Handloom & Powerloom

Established In
The Year 2004

www.clartechengineers.com

An ISO 9001:2015
Certified Company

Salient Features

Machine

- Excellent, Sturdy & Ergonomic design with integral beaming unit.
- Fix cone with dynamically balanced tubular metallic drum
- PLC for electronic & mechanical function controlling to ensure accurate length of warps.
- Auto home position & manual position of warp table.
- Pneumatic brakes on both sides with auto braking during power failure.
- Lost end memory & other intelligent operational features with high resolution colour touch screen display.
- Single motor with gear box for both warping & beaming and ensure constant line speed.
- Flat reed attachment with angular adjustment.

Creel

- M.S Fabricated, very sturdy, Vibration free structure with eyelet stand which is movable during section advancement while warping.
- Sufficient central passage to facilitate easy access to yarn breaks on either side quickly.
- Stop motion is equipped with Optical through beam sensor for faster response during yarn breaks.
- Separate indicators on each row enables quick identification of particular yarn breakage.
- 3 post tensioner unit with stainless steel discs, Ceramic eyelets and effective protective cover.

Technical Specification

DESCRIPTION	NEOTECH
WORKING WIDTH	1200 – 1800 MM
DRUM DIAMETER	600 MM
BEAMING UNIT	INTEGRAL WITH WARPING
MAXIMUM WARPING SPEED	100 MPM
MAXIMUM BEAMING SPEED	60 MPM
BEAMING TENSION	Upto 100 Kg
